

TrackTaro Guide

User Operations

- Gallery view

To go to the gallery view, the user can navigate to the home (“/”) page. Here the user can see the entire collection be displayed in alphabetical order. To interact with any item or artists, the user can just click on them

- Search view

To go to search, the user can navigate to the search (“/search”) page. The user can choose the property to search by in the dropdown to the left of the search bar. After any input is entered the search will be automatically triggered. To navigate to any of the results’ pages click on “View Details”

- Item Details

On this page the user can see item data in detail. To navigate to the artist’s page, simply click on the artist name.

- Artist Details

On this page the user can see the artist data in detail. To navigate to any of the items linked to this artist click on the button next to the item in the items list.

Admin Operations

Before using any admin flows, the user must first log in as an admin at the login (“/login”) page.

- Add an Item

To add a new item the user can navigate to the Add Item page (“add/item”). Here they can fill out all the item information. They can only link to existing artists, in case there is a new artist the user must navigate to artist creation directly, or using the button on this page.

All information must be filled out for the form to be submitted, including images and metadata.

- Add an Artist

To add an artist the user can navigate to the Add Artist page (“add/artist”). Here the user can enter the new name in input and wait for external data to be fetched, to make filling out information easier.

All information must be filled out for the form to be submitted, however members can be omitted (an artist can have no members).

- Edit an Item

To edit an item the user can navigate to the Edit Item page (“edit/item/{id}”), however the easiest way to do it is from item details with the “Edit” button at the bottom of the screen. Here the fields will be prefilled with the existing information and the user can change data at will.

Images which are not reuploaded are retained, however newer uploaded images override the old image data.

- Edit an Artist

To edit an artist the user can navigate to the Edit Artist page (“edit/artist/{id}”), however the easiest way to do it is from Artists details with the “Edit” button. The form will be filled out with existing information which can be updated after clicking “Submit”.

- Delete Item/Artist

To delete an item/artist the user should navigate to the corresponding item/artist details and find the “Delete” button. After pressing it, press the confirmation prompt.
